Accton

Asia AI Summit

2026.05.28

“In the AI era,
high-performance **networking** is
the foundation that enables every model
to scale, adapt, and respond in real time.”

About Accton

38 Years.

Birth of Accton

Accton was established on February 9, 1988 in Hsinchu Science Park, Taiwan.

1988

The company began by designing and manufacturing Ethernet and networking products, focusing on network hardware and communications equipment.

In November 1995, Accton became publicly listed on the Taiwan Stock Exchange (stock code: 2345).

1995

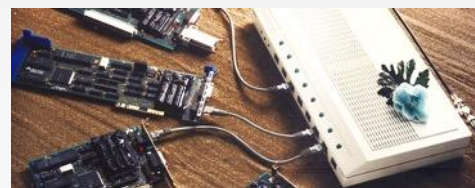

1998

OEM/ODM supplier

Accton provided network equipment to major OEMs, indicating early capacity for large-scale manufacturing and design flexibility.

Early 2000s

Birth of Edgecore Networks

Edgecore was founded in 2004, and formally spun off in 2010 (as Accton's subsidiary) to handle global branded business

2004 - 2010

2014

Pioneering open-network switch designs

In 2014 Accton submitted the first network design fully approved by Open Compute Project (OCP): a 10 GbE top-of-rack switch

In 2015, Accton contributed the industry's first open-design 100 GbE Ethernet switch (and also a design for 40 GbE) via OCP

Late 2010s

Growing role as major white-box / hyperscale supplier

Accton's white-box switch business grew substantially; according to market analyses, Accton became one of the world's top white-box switch manufacturers.

2021-2022

The Age of Intelligent Acceleration

Push toward 800G - 1.6T, AI/ML-optimized fabrics, open infrastructure & advanced system design

2023-2025

Transition toward 400G and preparation for AI / HPC networking demands

As demand for bandwidth surged (5G, Wi-Fi 6, IoT, cloud, AI), Accton responded by developing and shipping 400G switches at scale

Accton

2026

Accton continues to build the backbone that connects the world.

We Don't Just Design, **We Build**

Provider of Innovative Technology Services

Open Networking

We deliver **high-speed** switching and flexible, disaggregated platforms that scale cloud and AI networks.

Composable Compute

Our diverse compute solutions include network appliances, **GPU servers**, and CDI systems for optimal efficiency.

Data Center Infrastructure

Advanced rack systems and modular setups tailored for optimal performance in data centers.

Cloud Infrastructure

Cloud Infra solutions power **high-performance** platforms for data centers and AI.

Telecom Solutions

Our Telecom solutions deliver **open switch-routing** platforms for access and core networks.

Enterprise Platforms

Enterprise solutions offer feature-rich Ethernet and wireless platforms that **balance price and performance**.

With cutting-edge manufacturing built for the world's largest demands.

Globally Distributed
Production

Automated &
Flexible Lines

End-to-End Quality
Management

Our Locations
