

Third Quarter Fiscal 2026

Earnings Call Presentation

May 1, 2026

SAFE HARBOR STATEMENT

Statements contained in this presentation that are not based on historical facts are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of forward-looking terminology such as “should,” “could,” “may,” “will,” “expect,” “believe,” “estimate,” “anticipate,” “intends,” “continue,” or similar terms or variations of those terms or the negative of those terms. There are many factors that affect the Company’s business and the results of its operations and that may cause the actual results of operations in future periods to differ materially from those currently expected or anticipated. These factors include, but are not limited to: our supply chain and the demand for our products and services around the world; materially adverse or unanticipated legal judgments, fines, penalties or settlements; conditions in the financial and banking markets, including fluctuations in exchange rates and the inability to repatriate foreign cash; domestic and international economic conditions, including the impact, length and degree of economic downturns on the customers and markets we serve and more specifically conditions in the electrical grid, automotive, construction, aerospace, transportation, food service equipment, consumer appliance, energy, oil and gas and general industrial markets; lower- cost competition; the relative mix of products which impact margins and operating efficiencies in certain of our businesses; the impact of higher raw material and component costs, particularly steel, certain materials used in electronics parts, petroleum based products, and refrigeration components; the impact of higher transportation and logistics costs, especially with respect to transportation of goods from Asia; an inability to realize the expected cost savings from restructuring activities including effective completion of plant consolidations, cost reduction efforts including procurement savings and productivity enhancements, capital management improvements, strategic capital expenditures, and the implementation of lean enterprise manufacturing techniques; the potential for losses associated with the exit from or divestiture of businesses that are no longer strategic or no longer meet our growth and return expectations; the inability to achieve the savings expected from global sourcing of raw materials and diversification efforts in emerging markets; the impact on cost structure and on economic conditions as a result of actual and threatened increases in trade tariffs; the inability to attain expected benefits from acquisitions and the inability to effectively consummate and integrate such acquisitions and achieve synergies envisioned by the Company; increased costs from acquisitions to improve and coordinate managerial, operational, financial, and administrative systems, including internal controls over financial reporting and compliance with the Sarbanes-Oxley Act of 2002, and other costs related to such systems in connection with acquired businesses; market acceptance of our products; our ability to design, introduce and sell new products and related product components; the ability to redesign certain of our products to continue meeting evolving regulatory requirements; the impact of delays initiated by our customers; our ability to increase manufacturing production to meet demand; and potential changes to future pension funding requirements. For a more comprehensive discussion of these and other factors, see the “Risk Factors” section of the Company’s most recent annual report on Form 10-K filed with the SEC and available on the Company’s website. In addition, any forward-looking statements represent management’s estimates only as of the day made and should not be relied upon as representing management’s estimates as of any subsequent date. While the Company may elect to update forward-looking statements at some point in the future, the Company and management specifically disclaim any obligation to do so, even if management’s estimates change.

Q3 RESULTS – CONTINUED ORGANIC GROWTH & SIMPLIFICATION

Q3 SALES PROFILE

- Sales increased 8.1% YOY to \$224.6 million
- Sales increased 6.5% organically; Electronics increased 6.8% organically
- New product sales grew ~40% to ~\$18.7 million; Fast growth markets contributed >30% of total sales
