The World's Fully Independent BIOS Vendor with Global Reach

About Insyde®

6231.TWO

Insyde Software

- Founded in 1998 by PCT Chairman Jeremy Wang and SystemSoft EVP Jonathan Joseph
- Business started via acquisition of SystemSoft's BIOS division
- IPO January 23, 2003 (6231.TWO)
- Headquarters: Taipei, Taiwan
- Evolved from Independent BIOS Vendor (IBV) to Provider of Mature OpenBMC

#1 BIOS Vendor for Notebooks by Market Share !

insyde SINCE 1998 25 TWENTY-FIVE YEARS OF INNOVATION

Worldwide Presence

- **Headquarter in Taipei, Taiwan**
- Subsidiaries in Massachusetts (USA) and Shanghai (China)
- Representatives in Europe, India and Japan
- WW Employee numbers : 700+

BIOS – UEFI Firmware

BIOS is stored in the Flash memory and mounted on the motherboard.

- Activated when power button is pushed
- Diagnostic and setup the H/W
- Load and Run OS (ex. Windows/Linux/...)
- Provide services in the background

UEFI Forum

Unified Extensible Firmware Interface Forum

- Original EFI specification developed by Intel, 1999 – 2001
- Specification taken over by non-profit, collaborative trade organization in 2005 – UEFI Forum (http://www.uefi.org)

Insyde is one of the 9 “Initial Promoters”, the only promoter from Taiwan

51 Contributors

Google, NVIDIA, Qualcomm, Broadcom, Oracle, Cisco, Red Hat, Linaro, VMware, Linux Foundation,....., etc.

11 Promoters now

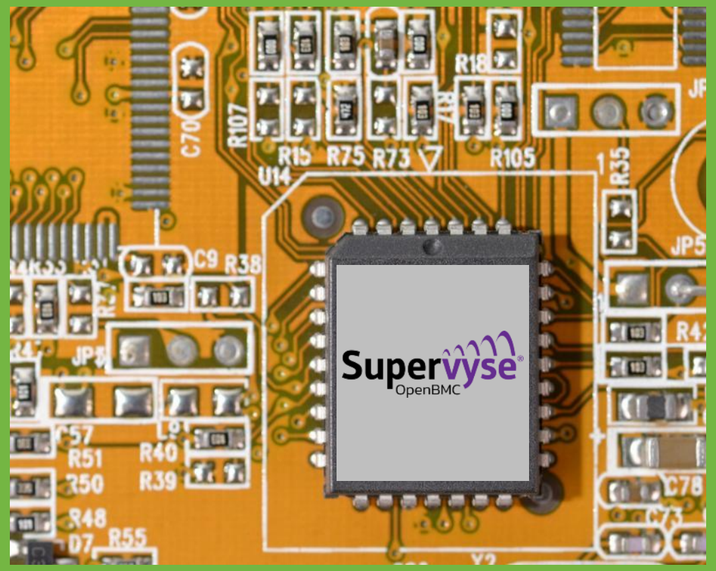

AMD, Intel, Microsoft, Dell, HP, IBM, Lenovo, AMI, Insyde, Phoenix, **Apple, ARM**

More than 200 Adopters

BMC – OpenBMC Firmware

OpenBMC is an open-source firmware project used for managing Baseboard Management Controllers (BMCs) in servers, storage, and networking devices. It enables remote monitoring, management, and recovery of systems independent of the main operating system.

OpenBMC

The **OpenBMC community** is an open-source, collaborative group of companies, developers, and Since 2018, it has been a Linux Foundation project, driving open **standards for server management firmware**.
(https://www.openbmc.org/)

- Standardizes firmware interfaces using modern technologies like D-Bus and Redfish.
- Encourages open collaboration among hardware vendors (e.g., IBM, Google, Intel, Meta), software engineers, and system integrators.
- Maintains public codebases, documentation, and design discussions through Linux Foundation stewardship, utilizing platforms like GitHub and community mailing lists for collaboration and transparency.

OpenBMC

Supervyse®

In 2022
Insyde was the first IBV to announce production-level OpenBMC software.

Insyde Supervyse® OPF Ready for ASPEED 8th Generation BMC chips

Next-Gen Silicon Support

First-to-market support for ASPEED's AST2700 ensures day-one readiness for upcoming server architectures

Quantum-Ready Security

Industry-leading integration of Caliptra 2.1 Root-of-Trust and PQC Algorithms (ML-DSA, L-KEM) Meet NIST SP 800-193 standards.

Enhanced Telemetry

Deep hardware-software synergy allows for "Anti-Tamper" protection, voltage glitch detection, and real-time monitoring

Secure with Insyde – Platform Root of Trust

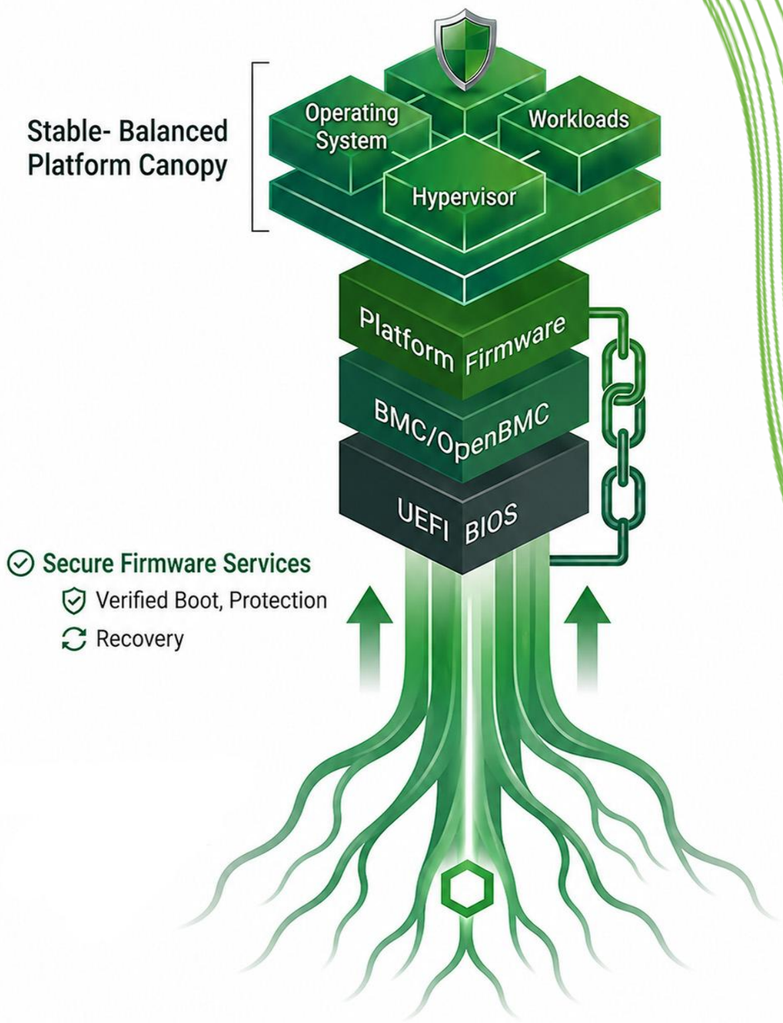

TapRUUT™
Platform Trust, Firmly Rooted.

TapRUUT™ is Insyde's Platform Root of Trust product family — the deep, immutable foundation that anchors platform security from the first instruction.

- **Anchors Security at the Silicon Level**
  - Establishes cryptographic identity before any higher-level firmware executes.
- **Open & Interoperable Across Client, Server & Edge**
  - Zephyr RTOS integration via Insyde EC, supporting multiple HRoT
  - OpenBMC integration w/ Supervyse OPF, supporting multiple HRoT
- **Goes Beyond NIST SP 800-193 Compliance**
  - Delivers the 3 pillars of NIST compliance: Protection, Detection and Recovery, plus a 4th – Attestation.
- **Launched with Strong Backing From Industry Partners:**

AMD ASPEED Infineon intel MICROCHIP

New AI Server Racks Provide Many Opportunities For Insyde Firmware

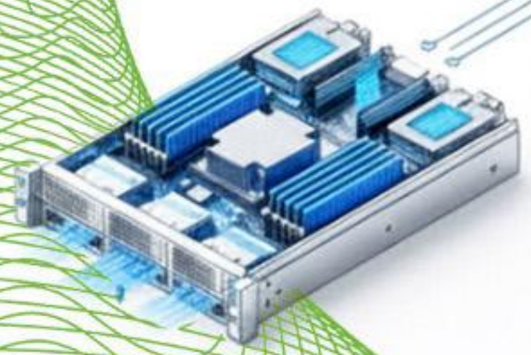

CDU Thermal Management
Precision control of CDUs for high- wattage heat dissipation

Intelligent Power Management
Direct management of Power Shelves (PSU/BBU) for peak shaving and load balancing

Compute Trays
Unifying management across heterogeneous silicon.

Switch Trays
Seamless integration of High-speed scale out and scale up switch connectivity management.

insyde H2O BIOS®

Supervyse®

Firmware Ecosystem In An Ai Rack

Firmware images across AI servers, network, power and cooling domains in a modern AI rack
Firmware images across AI servers, network, power and cooling domains in a modern AI rack

TOTAL FIRMWARE IMAGES / RACK: 250 – 300+ pcs

Distinct endpoints across compute, network, power & cooling

Silicon / firmware mapping

- ASPEED AST2700 / AST2720 / AST1030
- x86 InsydeH2O
- Root of Trust

One AST2700 & one x86 InsydeH2O for Switch Tray

X86 InsydeH2O Compute Tray

AST2700 for Compute Tray

TapRUUT for RoT

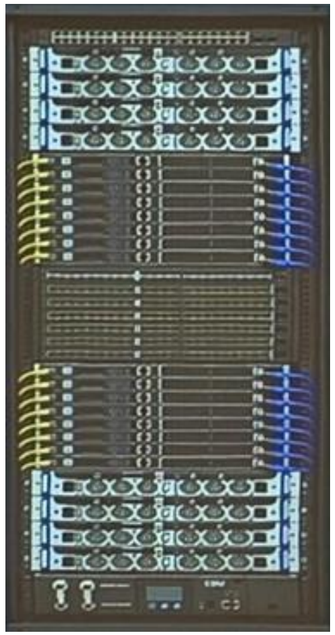

AST1030 for SatMC

1. TOR SWITCH

Switch OS	1
CPLD / BIOS / BMC firmware	3
Optics / transceiver firmware	Several

2. AI SERVERS

BMC firmware	18
System BIOS / UEFI	18
GPU firmware	72
EROT firmware	36
AMC firmware	18

H2O:19 ; OPF:39; TapRUUT:27

3. POWER SHELF

PSU firmware	48
Power shelf controller	8
Rectifier / BBU firmware	2

AST2720 for PMC on Shelf

AST2720 for PMC on BBU

4. SCALE-UP SWITCHES

NVOS switch firmware	9
NVSwitch ASIC firmware	18
BMC / FPGA / EROT firmware	54
Retimer / PHY firmware	Several

9 × AST2720 for Scale up

9 × TapRUUT for RoT

5. CDU

CDU controller firmware	1
Pump controller firmware	2
Leak detection firmware	2
MCU firmware	1

AST2720 for CDU

Physical AI

Insyde is in position for Physical AI: autonomous vehicles and robtics

On September 8, 2026, Arm launched Arm Total Design for Physical AI. Insyde was named a day-one partner.

Insyde delivers production boot and platform firmware for Arm Zena™ CSS, brought up on Arm virtual platforms before silicon arrives.

Customer software and silicon work run in parallel, shortening time to market.

Autonomous vehicles and robotics:
a long-term, future investment for Insyde.

OCP Global Summit 2026

Compute Unit Is Now the Rack

OPEN Compute Project®

AI Datacenter Trends

From Server Node to Rack

Node, rack, POD, whole data center.

Racks Toward 1 MW

100 kW to 1 MW, liquid-cooled, 800VDC.

Chip Vendors Go Rack-Scale

Rack platforms, specs set in OCP.

Product Opportunities

InsydeH2O

CPU servers recover; more x86 and Arm design-ins.

UPCI, openSFI, Rust memory safety.

Supervyse OPF

BMC becomes the data center backbone.

Redfish power and cooling, DC-SCM 3.0,

TapRUUT

Clearest security need; cross-sell with OPF.

SPDM, hybrid PQC, Caliptra 2.2, integrated HSM.

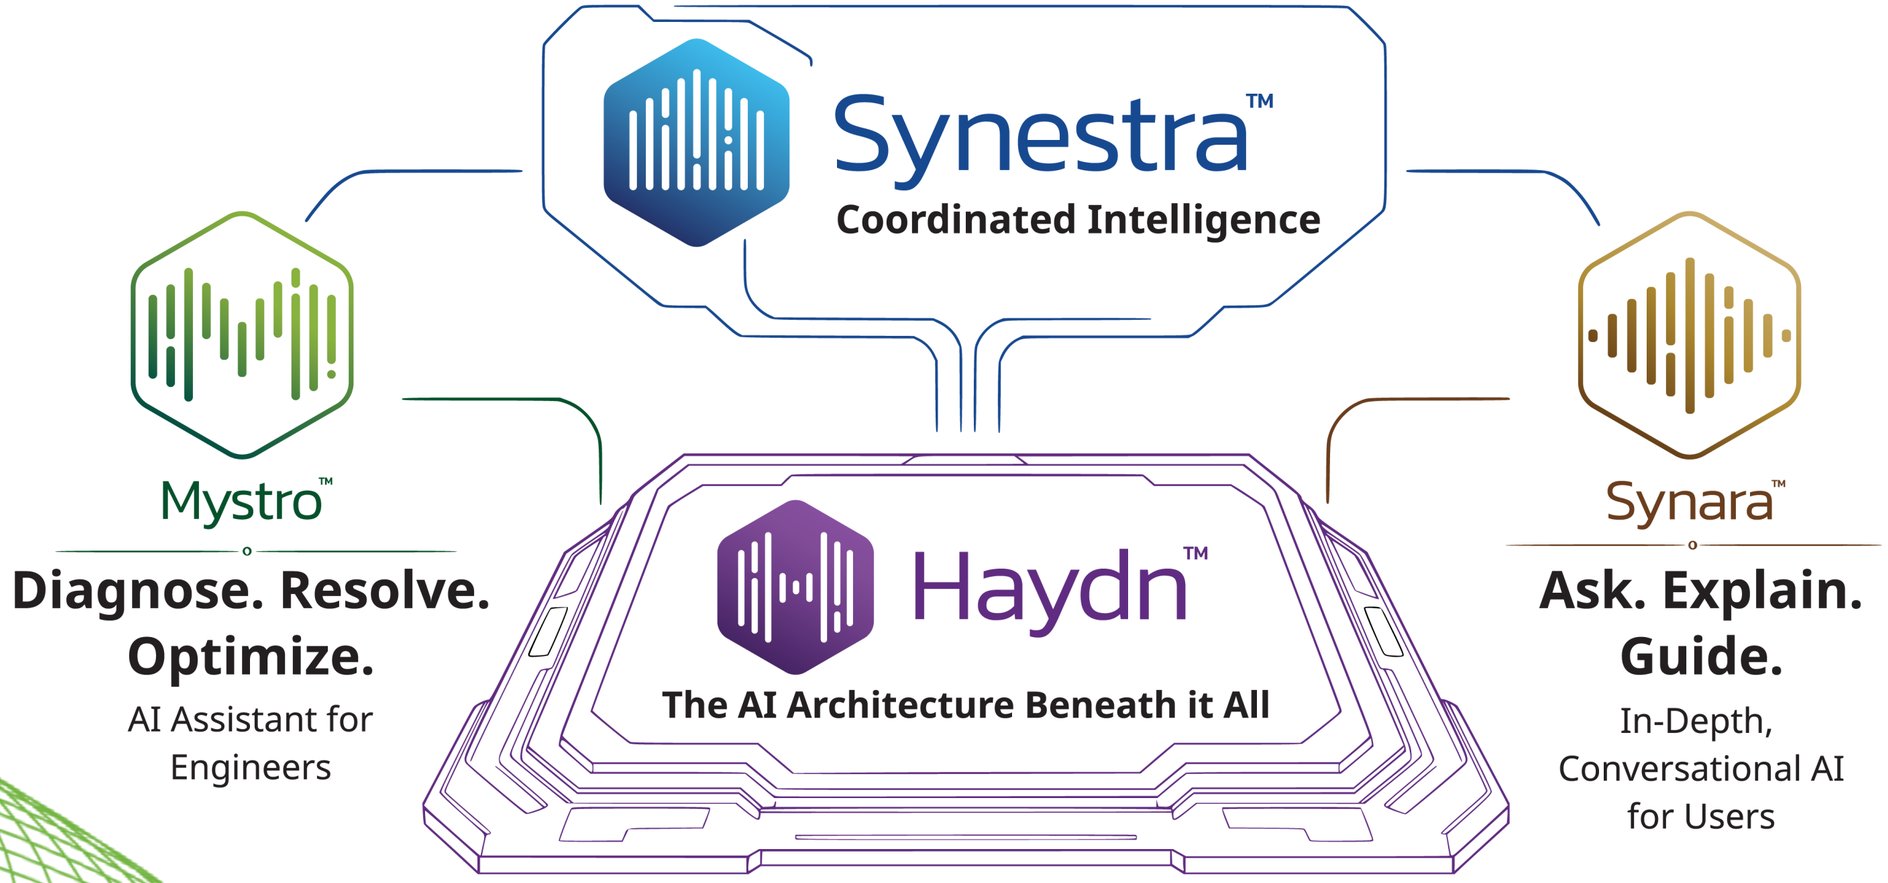

Chain of trust, chip to fleet

Chip → **Host firmware** → **BMC** → **Rack and fleet**

All three lines extend from motherboard to rack.

Accelerate with Insyde - AI

Insyde is helping its customers accelerate the development and adoption of the latest AI-focused technologies and compute platforms
