Anson Chiu, President
KT Lim, CFO

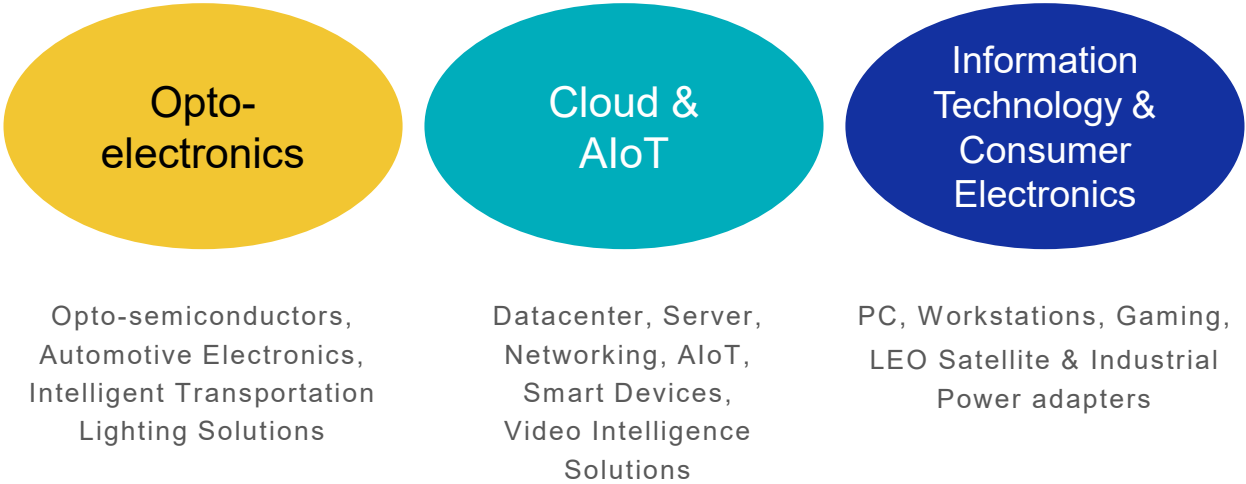

Safe Harbor Notice

The information contained in the Company’s statements is provided in accordance with applicable regulations and reflects data available as of the reporting date. Such information may become inaccurate or incomplete due to the passage of time or subsequent developments. The Company makes no representation or warranty, express or implied, as to the accuracy or completeness of the information and assumes no obligation to update or revise it.

The Company’s statements may contain forward-looking statements, which are based on current expectations, assumptions and projections as of the date of the reporting date, subject to risks and uncertainties, and actual results may differ materially. Factors include, but are not limited to, fluctuations in end market demand, changes in global economic and industry conditions, supply chain disruptions, geopolitical developments, volatility in raw material and energy cost, fluctuations in foreign exchange rate, technological changes, regulatory developments, and other risks described in the Company’s publicly filed documents.

Except as required by applicable law, the Company undertakes no obligation to update or revise any forward-looking statements because of new information, future events, or otherwise.

Profitable growth in Core Business & Margin Expansion by High-value focus since 2021

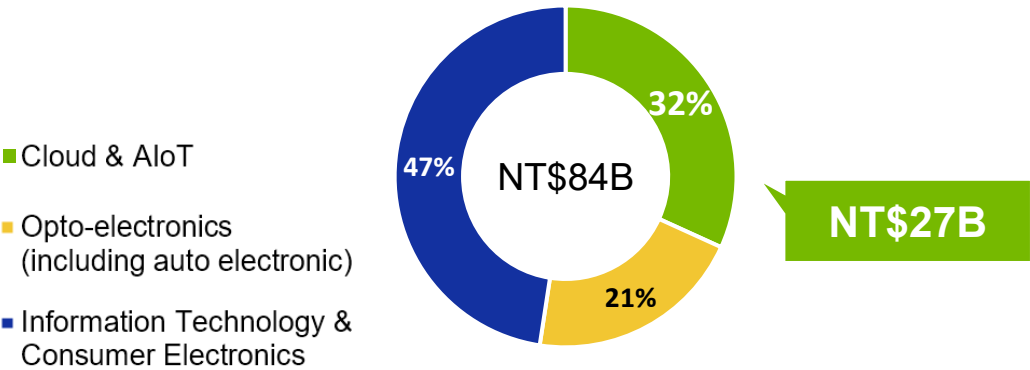

*Excludes Image department business
**Discontinued some consumer and OEM products

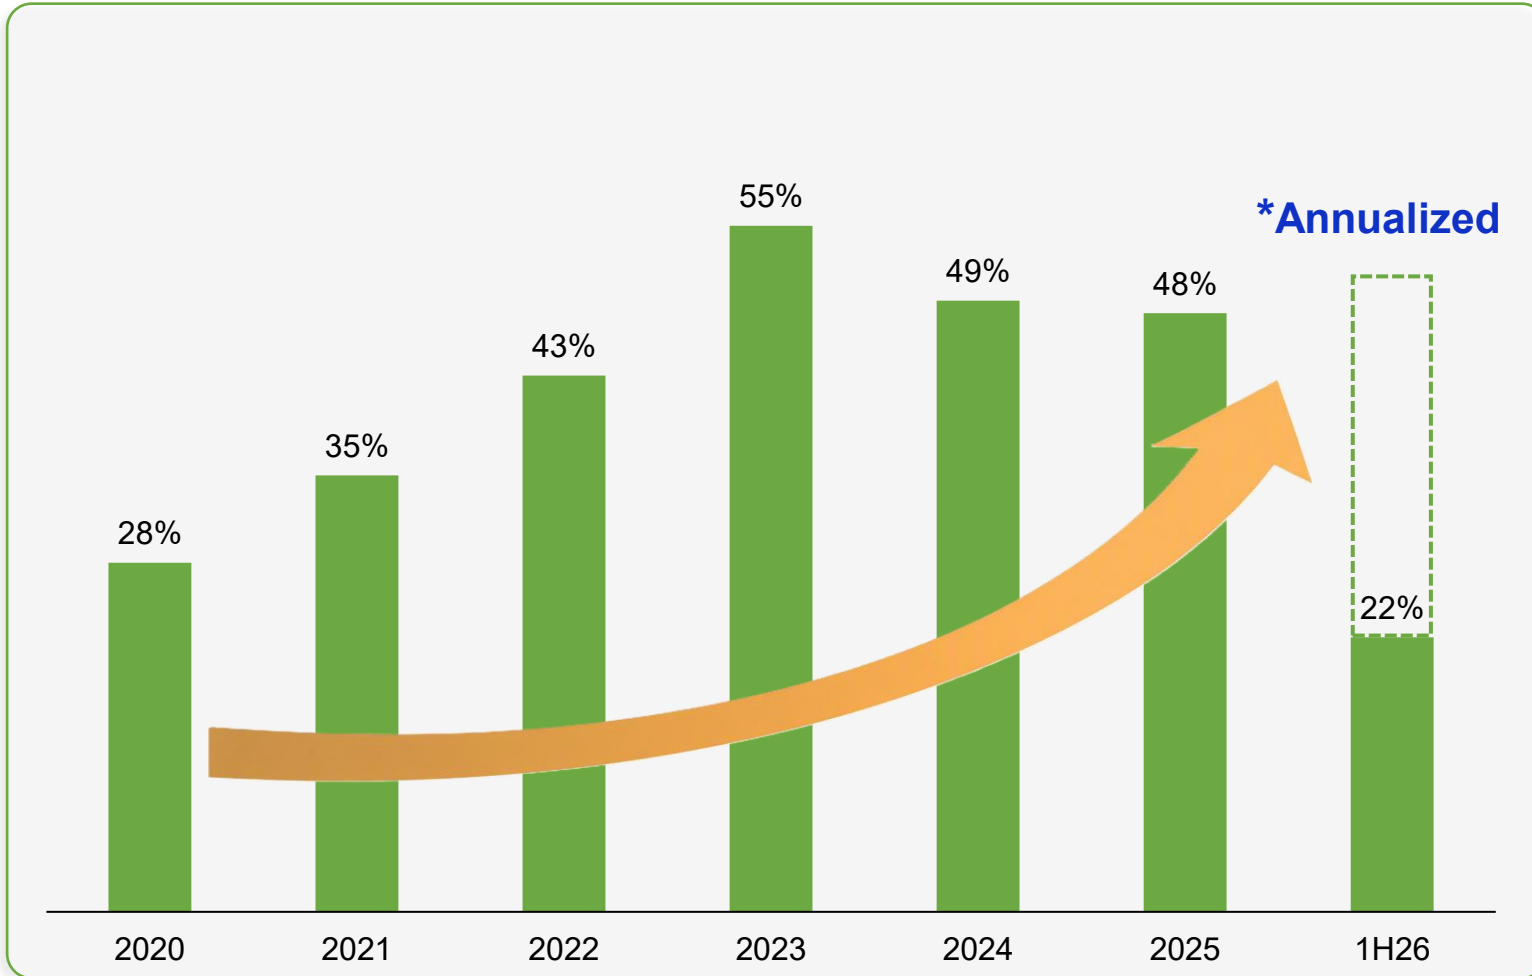

1H26 Product Mix

1H22 Product Mix

Solid ROIC Driven by AI Infrastructure Expansion and High-Value Business Growth

- Higher ROIC driven by a **rising mix of high-growth and high-value AI-infrastructure products**.
- Aggressive **working-capital management, operational efficiency improvement and disciplined capital deployment** will continue to drive invested-capital efficiency.

Note:

1. ROIC is calculated as Operating Profit after tax / Average [Net Working Capital + Net PP&E + Right-of-use Assets + Intangible Assets]

2Q26 & 1H26 Executive Summary

【2Q26】

- Q2 sales of NT\$52.7 billion, up 30% YoY, 21% QoQ; the Cloud & AIoT delivered over 70% yearly growth.
- Gross Profit of NT\$14.3 billion, up 60% YoY, Gross Margin were 27.2%, up 5.1 ppt YoY; Operating Profit of NT\$82 billion, up 120% YoY, Operating Margin were 15.6%, up 6.3 ppt YoY, resulting from synergies of strong demand for AI Datacenter, partial high-end product shipment deferred from 1Q, enhanced high-value business, economies of scale from global capacity expansion, and operational efficiency improvements through smart manufacturing.
- Q2 Net profits reached NT\$7.1 billion and EPS of NT\$3.14, up 126% YoY.

【1H26】

- 1H26 consolidated sales reached NT\$96.1 billion, up 25% YoY; Gross Profit of NT\$23.8 billion, up 38% YoY, Gross Margin were 24.7%, up 2.4 ppt YoY;
- Operating Profit of NT\$12.3 billion, up 66% YoY, Operating Margin were 12.8%, up 3.2 ppt YoY; Net profits reached NT\$10.9 billion; EPS of NT\$4.8, up 66% YoY, reaching a record high level.

【Core businesses】

- Thanks to increased shipments of cloud computing products for AI server power management and energy storage solutions, cloud-related business has achieved over 100% yearly growth.
- Core application in Opto-semiconductors enhanced, driven by advanced visible LED in cloud computing and invisible LED.
- In IT&CE, shipments of high-end and LEO satellite power supplies increased yearly.

【Board Resolutions】

- BOD approved the cash dividend of NT\$2.5 per share in the second quarter of 2026.

Operation Plan and Growth Strategy

Growth Strategy & 3Q26 Outlook

1

Growth Strategy

- 2026 CAPEX plan of NT\$18 billion, up from NT\$13 billion prior.
- US\$919 million investment in McKinney, Texas to expand advanced manufacturing, operational management and engineering R&D, supporting AI infrastructure and energy management solutions, including HVDC Power Racks.

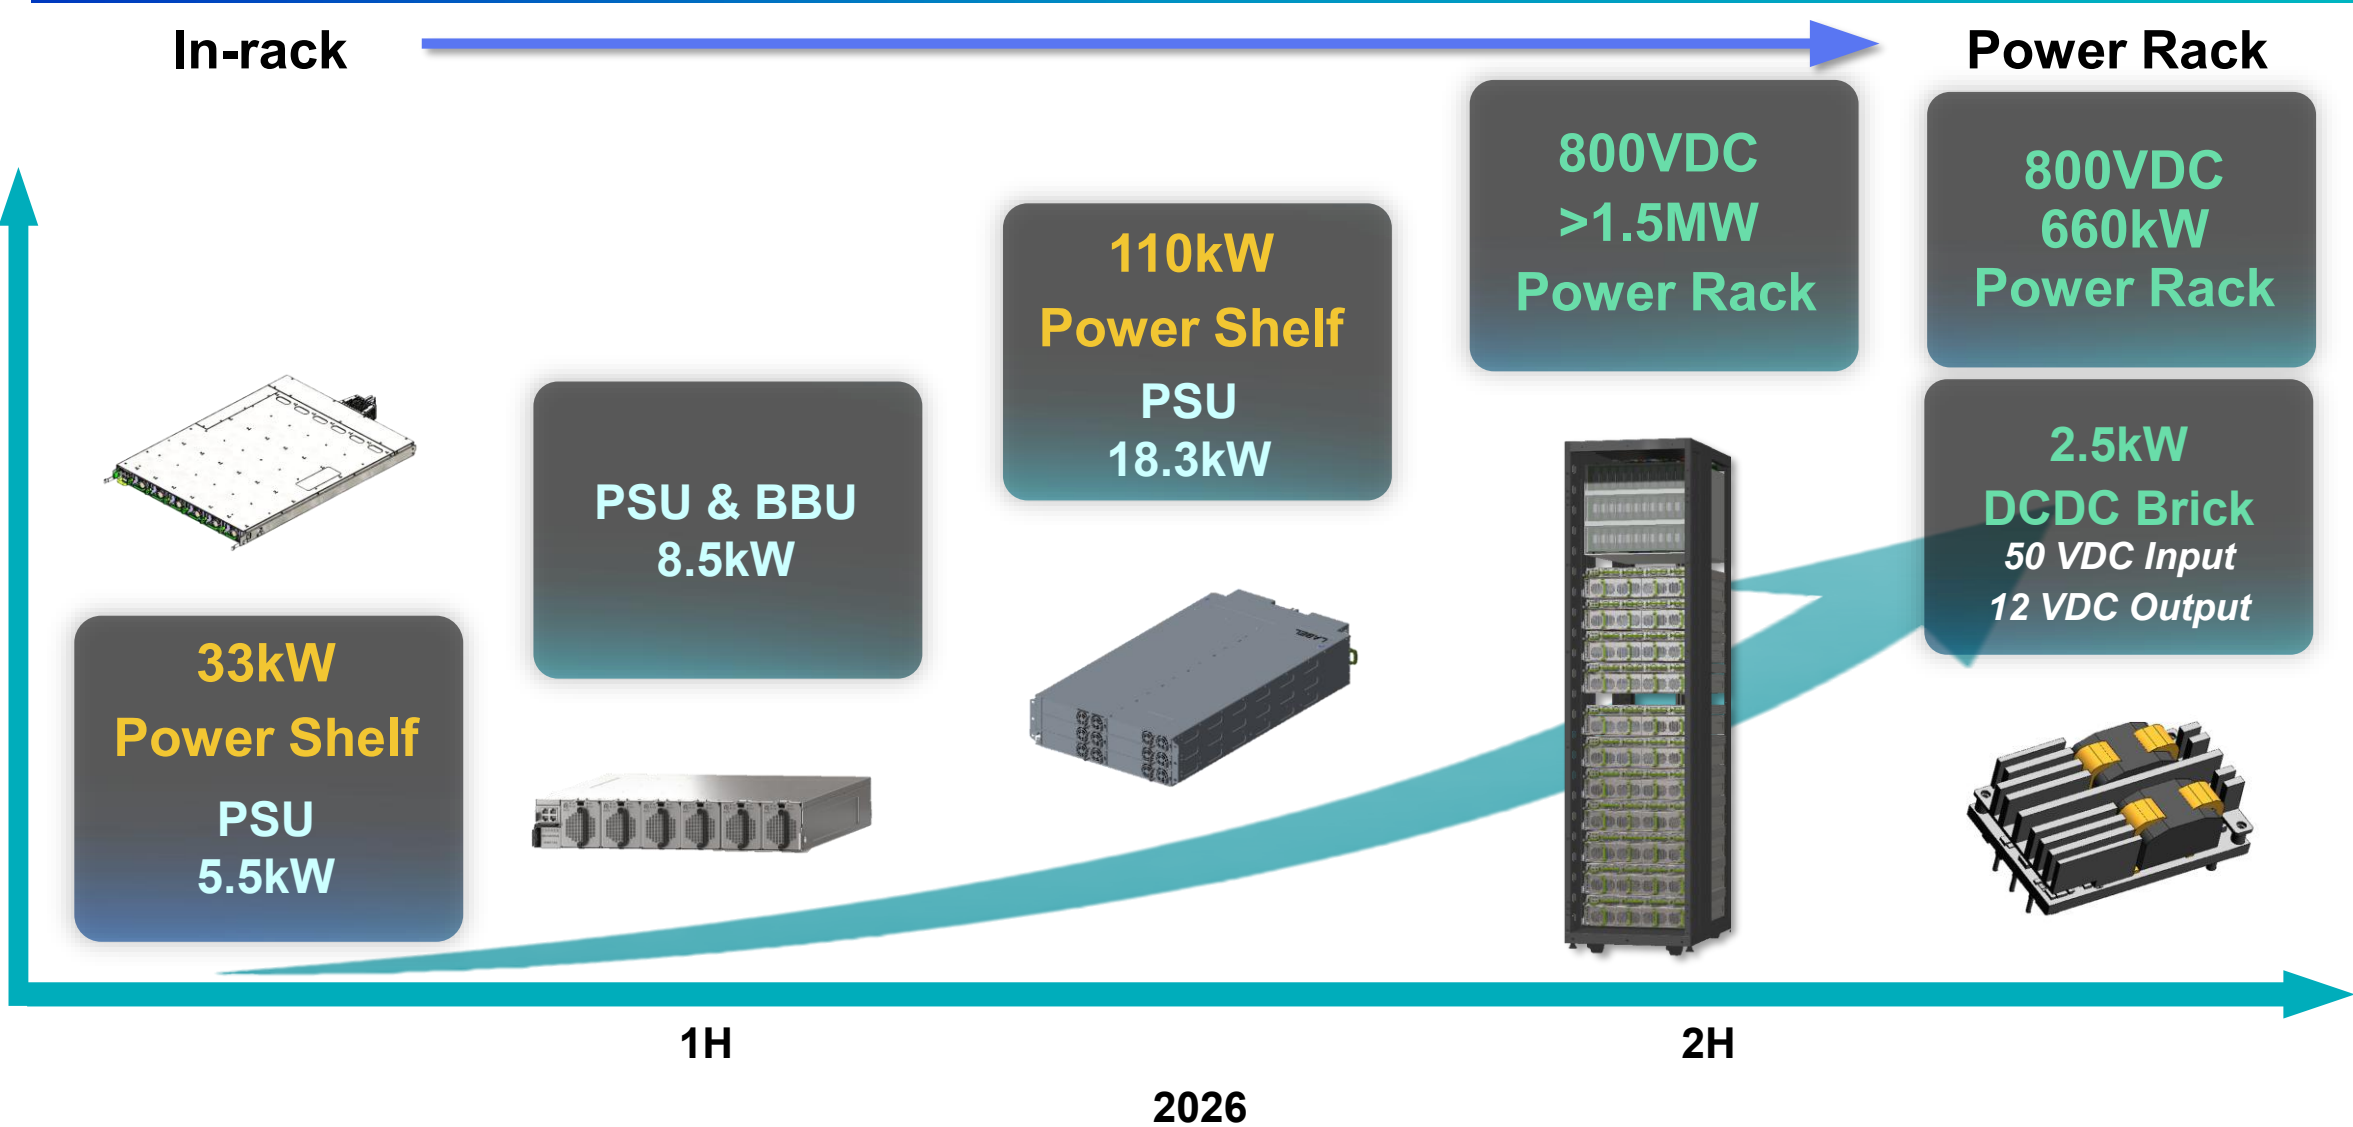

2

3Q26 Outlook: Core businesses are expected to deliver strong yearly and quarterly growth

Driven by next-generation AI power and energy management system upgrades, **AI revenue contribution is expected to exceed 30% in 2026:**

- Next-generation 8.5kW PSU & BBU entering volume production, 110kW Power Shelf entering shipments
- 800VDC Power Rack scheduled to complete certification in 2H26
- Strong momentum in high-end IT power supplies, with low-Earth orbit (LEO) satellites power solution more than doubling yearly. LITEON is positioned as a key supplier.

Next-generation AI power management and energy storage system upgrades to accelerate growth momentum

LITEON Delivers Cutting-edge, Fully Integrated Server Power Solutions Tailored for Next-generation HVDC solutions

Key Components	Descriptions
PDU 	Distribute electricity within power rack with AC input, DC output, and hot-swappable component
PSU/ Shelf 	Power Density >100W/in³, efficiency > 97.5%, working temp at 40~70° C Proven track records in >3kW products for tier-1 customers
Power Management Controller 	Data communication between power shelf & system applications Power Management to enable system level configurations and management
BBU/ Shelf 	12kW/2U, supply 50V full-power backup for 45sec during AC power loss 22kW/3U, supply 800V full-power backup for 60sec during AC power loss
Supercap Shelf 	Unique characteristics of low internal resistance, long cycle and calendar life, and wide operating temperature range
Mechanical Rack 	- High load capacity at >3,000kg; precise manufacturing tolerance <2mm - Rack level assembly integration up to level 9

Next-generation Power Rack System

Strategic investment in DenseLight to strengthen positioning in AIDC high-speed optical communications

01

DenseLight's comprehensive InP optical component capabilities and ELS application portfolio support expansion into the AIDC high-speed optical communications market and customer base

- Fully integrated InP IDM spanning epitaxy, wafer fabrication, laser components, and packaging & testing, strong focus on InP CW DFB lasers and ELS solutions for AI high-speed optical modules, with a diversified global customer base.

02

Capturing AI Infrastructure Optical Communications Growth Driven by Rising AIDC Data Transmission Demand

- Rising AI bandwidth demand drives high-speed optical communications adoption. Growing penetration of 800G, 1.6T and future 3.2T optical modules is expected to expand the global data center optical interconnect market to US\$35 billion by 2030 (15% CAGR), creating long-term growth opportunities for LITEON across the AIDC optical communications value chain.

03

Expanding from core optical competency to AIDC system-level optical communications solution provider

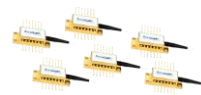

- LITEON enables global production and delivery through advanced optical packaging, system integration and cross-regional manufacturing, enhancing supply chain resilience to meet hyperscalers' diverse and global needs.

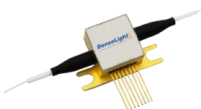

Singapore InP-based optical communications component IDM

- Target: DenseLight Photonics (Cayman) Co., Ltd.¹
- Investment amount: USD 34.2 million
- Purchase shares: ~18.8 million shares
- Shareholding: ~21.22%²
- Board seats: one board seat
- Valuation: P/S ~18x³

Key Data Center Products

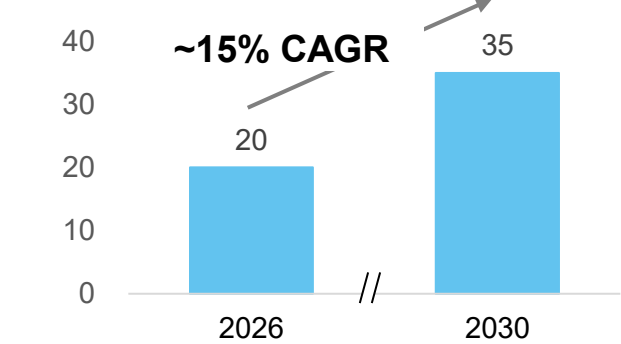

InP-based CW DFB Lasers
data center applications to support 800G / 1.6T front-end and back-end

Coherent Comms Laser
Gain chip for 800G / 1.6T-ZR and TX-SOA for 800G-ZR

Global Data Center Optical Interconnect Market Size (USD BN)

Note 1: DenseLightSemiconductors Pte Ltd is the 100% subsidiary (operating entity) of DenseLightPhotonics (Cayman) Co., Ltd. (holding company)

Note 2: based on 88,403,059 outstanding shares of DenseLightPhotonics (Cayman) Co., Ltd. after investment

Note 3: Based on consolidated revenue of DenseLight Photonics (Cayman) Co., Ltd. in 2025
