Safe Harbor Notice

The information contained in the Company's statements is provided in accordance with applicable regulations and reflects data available as of the reporting date. Such information may become inaccurate or incomplete due to the passage of time or subsequent developments. The Company makes no representation or warranty, express or implied, as to the accuracy or completeness of the information and assumes no obligation to update or revise it.

The Company's statements may contain forward-looking statements, which are based on current expectations, assumptions and projections as of the date of the reporting date, subject to risks and uncertainties, and actual results may differ materially. Factors include, but are not limited to, fluctuations in end market demand, changes in global economic and industry conditions, supply chain disruptions, geopolitical developments, volatility in raw material and energy cost, fluctuations in foreign exchange rate, technological changes, regulatory developments, and other risks described in the Company's publicly filed documents.

Except as required by applicable law, the Company undertakes no obligation to update or revise any forward-looking statements because of new information, future events, or otherwise.

Capital deployment for growth strategy:
strategic procurement, strategic investments, and CAPEX

Profitable growth in Core Business & Margin Expansion by High-value focus since 2022

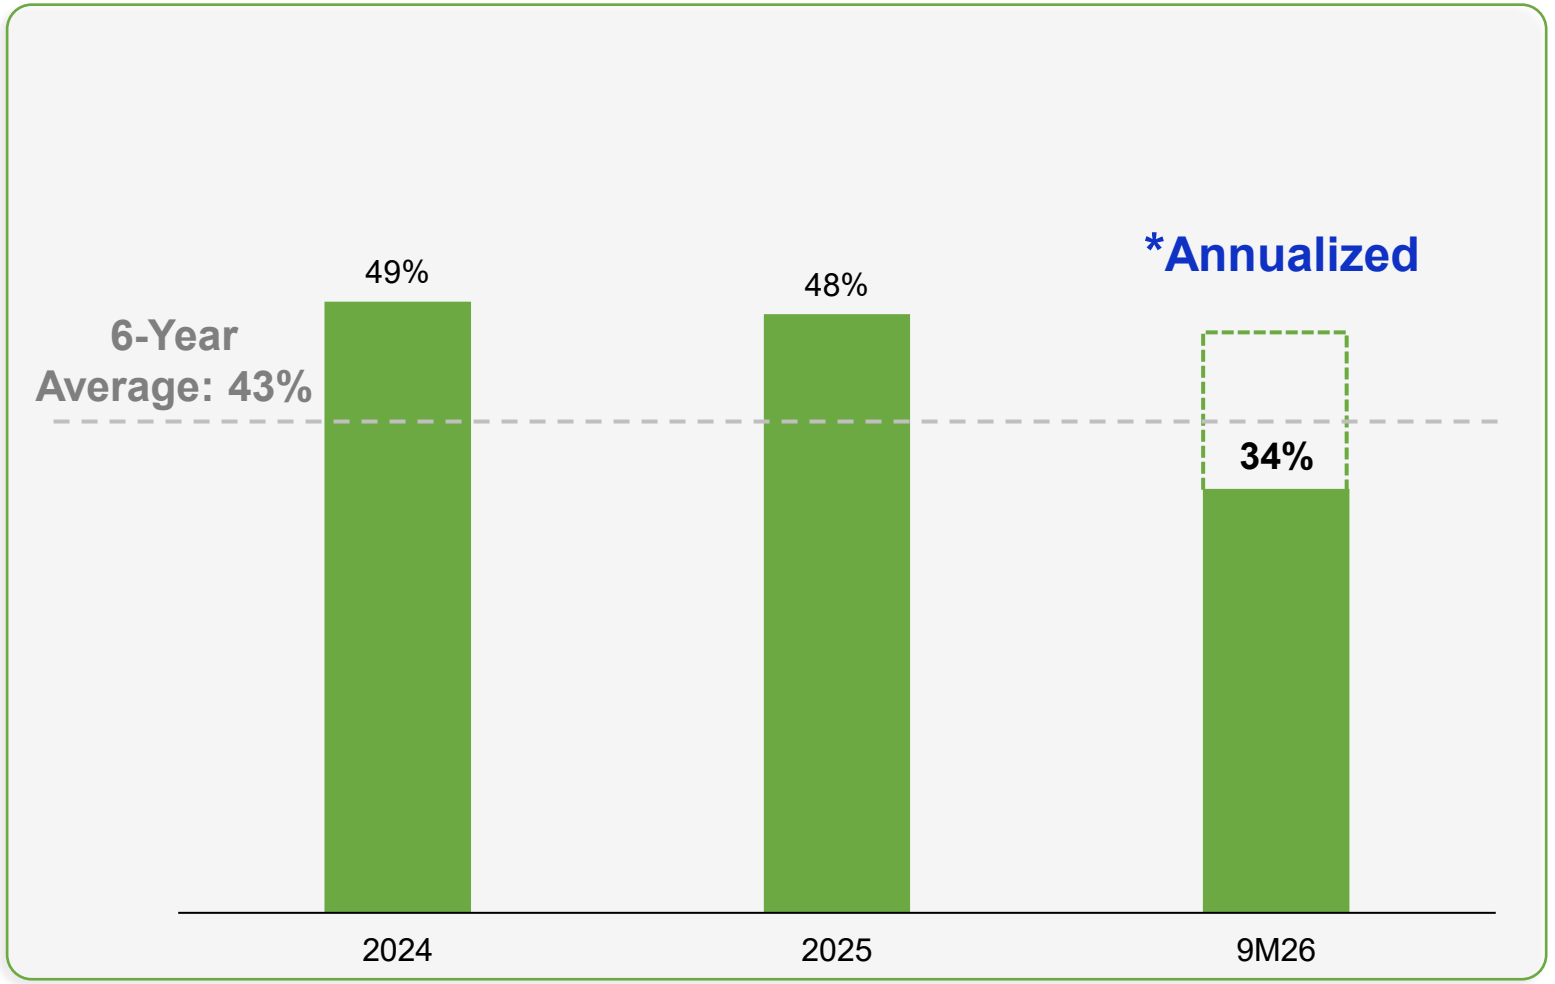

*Excludes Image department business

**Discontinued some consumer and OEM products

Solid ROIC Driven by AI Infrastructure Expansion and High-Value Business Growth

- Higher ROIC driven by **a rising mix of high-growth and high-value AI-infrastructure products.**
- Aggressive **working-capital management, operational efficiency improvement and disciplined capital deployment** will continue to drive invested-capital efficiency.

Note:
1. ROIC is calculated as Operating Profit after tax / Average [Net Working Capital + Net PP&E + Right-of-use Assets + Intangible Assets]

3Q & 9M26 Executive Summary

【3Q26】

- Q3 sales of NT$57.4 billion, up 28% YoY, 9% QoQ; the Cloud & AIoT delivered nearly 60% yearly growth.
- Gross Profit of NT$14.9 billion, up 32% YoY, Gross Margin were 25.9%, up 0.9 ppt YoY, exceeding 24.7% in1H26; Operating Profit of NT$8.7 billion, up 85% YoY, Operating Margin were 15.1%, up 4.7 ppt YoY, exceeding 12.8% in1H26, resulting from synergies of strong demand for AI Datacenter, enhanced high-value business, economies of scale from global capacity expansion, and operational efficiency improvements through smart manufacturing.
- Q3 Net profits reached NT$7.4 billion and EPS of NT$3.27, up 60% YoY, a new quarterly record high.

【9M26】

- 9M26 consolidated sales reached NT$153.5 billion, up 26% YoY; Gross Profit up 36% YoY, Gross Margin were 25.2%, up 1.9 ppt YoY;
- Operating Profit up 73% YoY, Operating Margin were 13.7%, up 3.8 ppt YoY; Net profits of NT$18.3 billion; EPS of NT$8.08, up 64% YoY, reaching another record high level.

【Core businesses】

- Thanks to increased shipments of cloud computing products for AI server power management and energy storage solutions, cloud-related business has achieved 80% yearly growth.
- High-end opto-semiconductor applications continued to expand across cloud computing, industrial automation, and renewable energy.
- Shipments of high-end power increased; LEO satellite power supplies doubled YoY.

【Sustainability-Linked Loan to Accelerate AI Expansion】

- Secured the first NT$36 billion sustainability-linked syndicated loan to accelerate global AI expansion and strategic investments, enhancing operational resilience and global competitiveness.

Growth Strategy & 4Q26 Outlook

1

Growth Strategy

- Expand Grid-to-Rack AI infrastructure capabilities through strategic investments and M&A, targeting power, thermal, system-level racks, and high-speed optical communication. Showcased 800VDC Power Rack, 2.6MW CDU, and DC/DC Power Brick at OCP, demonstrating system integration capabilities for AI Factory era.
- Spin-off of Advanced Mechanical Infrastructure to enhance resource allocation, specialization, competitiveness and accelerate liquid cooling business.
- Strategic investment in Yinchuan Xinanrui Electric to expand high-power transformer and inductor technology and strengthen critical component portfolio for AIDC power management.

2

4Q26 Outlook: Core businesses are expected to deliver yearly and quarterly growth

Driven by next-generation AI power and energy management system upgrades and mass production of integrated racks, **AI revenue contribution is expected to exceed 30% in 2026**:

- Mass production of 8.5kW PSU & BBU for ASIC and next-generation VR 110kW & Helios 42” Power Shelf.
- Sample shipment of 800VDC Power Rack in 4Q26.
- Strong momentum in high-end power supplies. Low-earth orbit (LEO) satellites power solution more than doubling yearly; LITEON is positioned as a key supplier.
